

Change the world with design!

We are holding a competition
for students around the world to design for SDGs.

SDGs Design International Awards 2021

We are calling for "design" that can save the world, from students all over the world who are interested in design. The SDGs Design International Awards will be held again this year to show good solutions to the world.

We are soliciting creative ideas to solve social issues from students all over the world.

There are things we can contribute to solving social issues!

We are waiting for applications from the younger generation
who are trying to solve complex social problems.

Theme

Let's Create a Carbon-Neutral Society.

Think big, Start small, Move fast

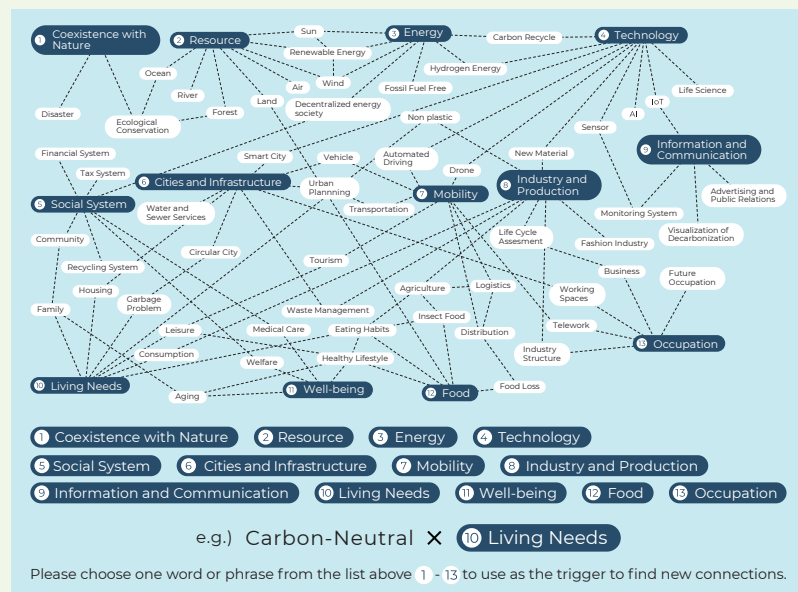

The theme of this year's SDGs Design International Award, now in its third year, is "Carbon Neutrality". We are calling for ideas from all over the world. Please choose one of the two themes below to submit your idea. Multiple entries are also welcomed.

Theme

Think big

1 Design a Carbon-Neutral City

We live in a variety of environments and systems every day. The map below is a mapping of related words. For example, what would a carbon-neutral city look like based on the concept of "carbon neutral x transportation (cities and infrastructure)"? Using the map as a hint, please add words, find new connections, and develop ideas for realizing the carbon-neutral city you want to see in the future.

You can see a large map on the web site.

Please design according to the given theme and use the entry form provided on the website.

The entry form can be downloaded by clicking on the "Apply" button on the website.

For more information, please refer to <https://www.sdgs.design.kyushu-u.ac.jp/awards/english/>

Theme Start small

2 Design a Carbon-Neutral Lifestyle

The accumulation of small actions will create the carbon-neutral society of the future. What kind of suggestions would you give people close to you to help them change their mindset and take action toward carbon neutrality? Please choose one topic from the following list and develop your proposal.

Toyota Motor Kyushu Award

1 UX design allows everyone to enjoy knowing and learning "How can we not emit CO2?".

PIETRO Award

2 Ideas on carbon-neutrality that can be fun and done through "food" at home.

Kyushu Mirai Construction Group Award

3 Design on sustainable buildings through resource circulation such as materials and energy.

Kyushu University Negative Emission Technology Award

4 Design a useful and sustainable product that incorporates the technology of converting air into energy.

Schedule

Application Period

May 15 – September 21, 2021, Japan Time

Announcement of First Review Results

October 1, 2021

Application Period for Final Review

October 1 - October 7, 2021

Announcement of Final Review Results

October 13, 2021
