

Change the world with design!

We are holding a competition
for students around the world to design for SDGs.

SDGs Design International Awards 2022

We are calling for "design" that can save the world, from students all over the world who are interested in design. The SDGs Design International Awards will be held again this year to show good solutions to the world.

We are soliciting creative ideas to solve social issues from students all over the world.

There are things we can contribute to solving social issues!
We are waiting for applications from the younger generation
who are trying to solve complex social problems.

Application period June 15-September 30, 2022

The Award Ceremony November 12, 2022

Let's Design High-Quality Educational Experiences!

From Kyushu University, let's show the world the "High-Quality Education" that students worldwide have thought up!

Theme

1

Let's Design "High-Quality Educational Experiences!"

Why not rethink the idea and process of education in our schools? In this era of rapid change, what is the role of education that is needed today? What is the goal of education? What is the best type of education needed by the young people who will be responsible for the future? How should we collaborate with companies? How should Asia and the rest of the world collaborate to create better education for the future? We are looking for design ideas that combine the following four keywords and "Education" from around the world.

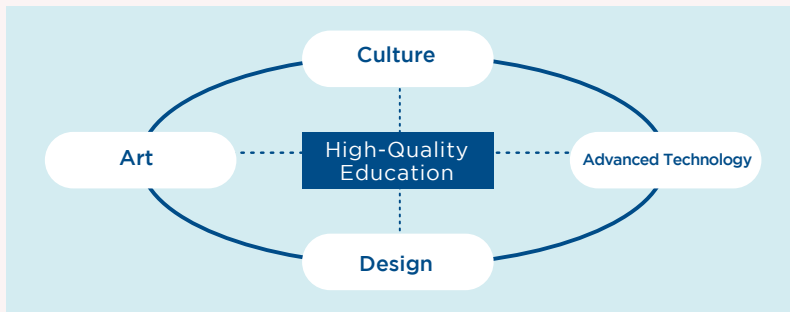

"Culture", "Art", "Design", "Advanced Technology"

"Education X Culture" -New possibilities for education from a cultural perspective-
e.g.) Classes that Allow Students to Experience dining at Home in Different Parts of the World

"Education X Art" -New educational possibilities created by fusing education and art-
e.g.) Creating a Happier Future: An Elementary School Curriculum Specializing in Art

"Education X Design" -Creating classes, environments, and systems for education utilizing design methods-
e.g.) Educational Programs to Provide a Happier Future for the Socially Vulnerable

"Education X Advanced Technology" -Proposal for future education utilizing advanced technology-
e.g.) Development of Educational Programs and Tools that Use Big Data and AI to Propose a Happy Future for Unequal People

2

Let's Design "High-Quality Educational Experiences" with the Companies!

Solving social issues cannot be achieved by one person alone. Collaboration with companies and local communities is also important. What kind of education can each company offer in the areas in which they wish to improve society? We are looking for ideas for class curricula, events, apps, educational facility design, art, and more.

YUKO LUCKY Group Award

Let's Design a Learning Place for Adults that will Revitalize the Community.

Marine World Award

Design learning opportunities and systems that encourage people to participate in activities to preserve the richness of local oceans and rivers for the future.

Kyushu Gas Award

九州ガス株式会社

A fun design that teaches people that the energy choices they make at home are important in many ways.

Please design according to the given theme and use the entry form provided on the website.

The entry form can be downloaded by clicking on the "Apply" button on the website.
