Let's Design a Learning Place
for Adults that will Revitalize the Community

YUKO CO.LTD.

The Yuko Group operates pachinko parlors, restaurants, golf courses, training gyms, and other facilities used by many. In particular, our 28 pachinko parlors in Japan, with their spacious premises and parking lots, attract a large number of adults, both for entertainment and convenience. Yuko's facilities are primarily used by locals, and we place great importance on our relationship with the community.

Those who use these facilities fundamentally visit them for purposes such as "fun," dining," and "exercise." At the same time, however, these facilities have the potential to provide opportunities for personal growth to the local people who visit them, as places to "learn" and gather information.

"Even Adults Want to Learn!"
In rural areas, there are not many places and opportunities for so-called adults, including elderly, to learn. Therefore, we are looking for ideas to connect people, form local communities, and revitalize these communities utilizing the keyword "Education." We look forward to receiving your design ideas for creating new places for Learning that take advantage of the management resources of YUKO Group.

Pachinko parlors have pachinko and slot machines; customers sit down at a table to play. Each pachinko parlor has 500 to 1,000 machines in its spacious building, with a large parking lot.

In addition to pachinko parlors, the company also operates restaurants, golf courses, training gyms, and other facilities.
